AIG Energy Differentiators

Specialist Expertise

Substantial underwriting, claims and engineering expertise in all areas of the energy industry. Delivering bespoke solutions for clients' core businesses and fringe exposures.

Multinational & Captives

AIG has a Global Network of strong local AIG offices and top tier local insurance partners. Ability to handle captive fronting and wrap-around captive programmes.

Tailored Relationships

Long term sustainable relationships with direct contact with the client and AIG. Effectively work with brokers and clients to supply tailored solutions for unique programme and wording design.

Risk Engineering

Multi-disciplinary team of property risk engineers with decades of industry experience who help mitigate catastrophic property damage and business interruption loss via: assessments, evaluations and best practices for unique and complex occupancies.

Market Leading Capacity

Our engineering expertise means we can take the high hazard risks in Chemicals that the Property market otherwise rejects.

Claims

The AIG Energy Claims Promise affirms that our dedicated team of claims experts will mobilise in rapid response to a covered event and, after coverage is confirmed, will advance our policyholders up to 50% of our share of the agreed estimate within 7 days, giving them the immediate working funds they need for damages, repairs, clean-up costs and extra expenses.

What does it cover?

- Property damage/repairs
- Clean-up costs
- Extra expense/additional increased cost of working

The estimate is to be agreed between the policyholder, broker and the AIG representative, based upon reasonably available information. This payment is made on an unallocated basis.

Workshops

A Claims Seminar/Workshop was proposed to a major phosphates manufacturer to help conclude a number of claims. The workshop facilitated open discussion between all parties and was successful. Following this, the Insured produced its own internal claims procedure document to manage claims in the future.

Reduction in Business Interruption Loss

A furnace explosion at a plant caused extensive damage to a boiler on one of their production lines. AIG helped identify temporary boiler units while permanent repairs were planned and material secured for a planned outage. This saved the Insured four months of down time and enabled them to maintain production to meet the market demand.

Early Advance Payment

Large chemical plant in Canada suffered significant damage to one of their compressors. AIG led the market with early advance payment in the amount of \$11m, which assisted the Insured in expediting repairs and a return to full production.

Working with AIG

To unlock and get the most out of our outstanding underwriting expertise and capabilities we have outlined some key requirements which are considered with each risk:

Recent in-depth engineering survey reports of the top locations

At least 5 years loss history

Risk quality will be the driver for risk selection
